

## Distributed Systems Part II

### Bonus

### Bonus

Your task is to create an exam question including a (correct) solution for one of the topics covered in the lecture. We might use your question as inspiration in the actual exam. Please note the following facts:

- The deadline to submit your exam question is December 7th.
- You can improve your exam grade by a quarter; this bonus will be added at the end of the grading process.
- Send your exam question as a PDF file.
- It should be a non-trivial question (i.e., not a pure knowledge question).
- Do not simply copy-paste: We know our exercise questions and exam questions from the previous years, and we check material which obviously comes from third-party sources (other books, wikipedia, ...). We will also not accept minimal variations of such copied exercises. Come up with your own idea!
- Both the question and the solution should be as precise as possible.
- You will not receive feedback before December 7th. A few days later, we will inform you if you got the bonus. If only minor changes are needed, we will give you a brief time period to make those changes.
- Send your exam question to David Stolz. Please use “[DistSys Bonus] lastname firstname” as subject line. Please name your file `lastname_firstname.pdf`.
- If you are repeating this course and have received a bonus last year, then let us know. In this case, you keep your bonus.
