# Distributed Systems Part II
# Bonus (Round 2)

## Second Chance

We decided to offer a second chance to get the bonus points for part 2 of the lecture. The deadline is December 19th. The criteria to receive the bonus points are the same as in the first round (see below). However, there will be no possibility to fix your submission if you do not get the bonus in this round.

- You cannot get bonus points more than once: If you already received a positive answer in the first round, you got the bonus.

- You can also submit something in the second round, even if you did not submit anything in the first round.

## Bonus (Round 2)

Your task is to create an original exam question including a (correct) solution for one of the topics covered in the part 2 of the lecture. We might use your question as inspiration in the actual exam. Please follow the following guidelines:

- The submission deadline is Tuesday, December 19th.

- It should be a non-trivial question, that is, not a pure knowledge question.

- Both the question and the solution should be as precise as possible.

- You must come up with your own idea. Do not try to cheat – we know our exercise sheets and old exams, and we check material which obviously comes from third-party sources (other books, Wikipedia, . . . ). Minimal variations of such copied questions are not acceptable either.

- Your submission should be in PDF format.

- Send your exam question to Manuel Eichelberger. Please use "[DistSys Bonus] `lastname firstname`" as subject line, name your file `lastname_firstname.pdf` and indicate the topic of your question.

- If you are repeating this course and have received a bonus last year, then let us know. In this case, you can keep your bonus.
