Solutions for the first exercise session are available on the website

**Exercise Proceedings**

At the beginning of every lecture week, we will publish a new exercise sheet here. This exercise sheet is intended to be solved during the exercise session on Thursday where two tutors will be available to assist you and to answer potential questions. The exercises often require information from the lecture notes, so please make sure that you have them available in some way.

You can hand in your solutions for correction after the exercise session on a voluntary basis. But this is not mandatory or required to be admitted to the exam.

**Old Exams**

Please keep in mind that the content of the lecture has been updated a few times in recent years! Thus, some of the material from the old exams might no longer be covered in the current lecture and additional material has been added.

**Lecture Material**

Today, we will follow the same process as last week
We will try to make this session interactive
Today, we will follow the same process as last week. We will try to make this session interactive.

Step #1: you try to solve the exercise

Once you have it solved, raise your virtual hand in Zoom.
Today, we will follow the same process as last week. We will try to make this session interactive.

Step #1: You try to solve the exercise. Once you have it solved, raise your virtual hand in Zoom.

Step #2: One of you volunteer to present its solution to the class. To do that please share your screen and describe your solution.
Today, we will follow the same process as last week. We will try to make this session interactive.
