”Testat”

Attestation Criterion

For the students whose exam question did not meet our criteria, we are offering a last chance. Your task is to create an exam question including a (correct) solution for one of topics of the lecture. If your question is extraordinary, we might use (a modified version of) it in the actual exam. Please note the following facts:

- The deadline to submit your exam question is the 3rd of June.
- Send your exam question either as pdf or as correct \LaTeX code.
- It should be a non-trivial question (i.e., not a pure knowledge question).
