

Distributed Systems Part II

Bonus (Round 2)

We decided to offer a second chance to get the bonus points for Part II of the lecture. The deadline is December 18th. The criteria to receive the bonus points are the same as in the first round (see below), however, there will not be any possibility anymore to fix your submission if you do not get the bonus in this round.

- You cannot get bonus points more than once: If you already received a positive answer in the first round, you got the bonus.
- You can also submit something in the second round, even if you did not submit anything in the first round.

Bonus (Round 2)

Your task is to create an exam question including a (correct) solution for one of the topics covered in the lecture. We might use your question as inspiration in the actual exam. Please note the following facts:

- The deadline to submit your exam question is December 18th.
- You can improve your exam grade by a quarter; this bonus will be added at the end of the grading process.
- Send your exam question as a PDF file.
- It should be a non-trivial question (i.e., not a pure knowledge question).
- Do not simply copy-paste: We know our exercise questions and exam questions from the previous years, and we check material which obviously comes from third-party sources (other books, wikipedia, ...). We will also not accept minimal variations of such copied exercises. Come up with your own idea!
- Both the question and the solution should be as precise as possible.
- You will not receive feedback before December 18th.
- Send your exam question to David Stolz. Please use “[DistSys Bonus] lastname firstname” as subject line. Please name your file `lastname_firstname.pdf`.
- If you are repeating this course and have received a bonus last year, then let us know. In this case, you keep your bonus.
